

COMPANY PROFILE

RAMCODE INVESTMENTS

Electromechanical Engineering · Water & Wastewater · AI & Software
Solutions

WHO WE ARE

Engineering Reliability. Building Digital Capability.

Ramcode Investments is a Bulawayo-based professional engineering services company founded in 2020, delivering electromechanical engineering, municipal water and wastewater infrastructure solutions, and modern AI-powered software platforms under one roof. We are led by an electrical engineer with over ten years of hands-on experience in municipal utility engineering, combined with a growing portfolio of deployed software products serving real businesses.

Our dual capability is what sets us apart: we design and rehabilitate the physical systems that keep cities running — water treatment plants, pump stations, switchgear, and street lighting networks — while also engineering the digital tools that help organisations run more efficiently. Few firms in the region combine both disciplines with genuine, demonstrated field experience in each.

10+YEARS IN MUNICIPAL &
UTILITY ENGINEERING**12+**

CORE DIVISIONS

Our Mission

To deliver dependable engineering and digital solutions that improve the safety, reliability and efficiency of the infrastructure and organisations we serve — from municipal treatment plants to enterprise software platforms.

What Sets Us Apart

- Direct, hands-on experience in water & wastewater treatment plant engineering
- In-house PLC/SCADA, power systems and instrumentation expertise
- Full-stack AI & software development capability
- FIDIC-standard tender and contract documentation

Where We Work

Zimbabwe · South Africa · SADC Region · Remote engagements worldwide

TRACK RECORD

Water & Wastewater Engineering Experience

Our team brings over ten years of direct engineering experience with **The City of Bulawayo** — the second largest municipality in Zimbabwe — where our Director served as an Electrical Engineer in the Water Department, covering the design, engineering, procurement, installation, commissioning and maintenance of electrical, instrumentation and control systems across the city's water and wastewater treatment plants and pump stations.

Representative Water & Wastewater Projects

WASTEWATER · BNR

Rehabilitation of Aisleby 3 Wastewater Treatment Plant

Supply & installation of bar screens, centrifugal pumps with new motor starters, a new clarifier drive system, and inlet/outlet flow meters with data logging, plus new bio-reactor aeration automation. Full condition assessment of the plant (dormant since 2017) covering inlet works, sluice channels, Parshall flumes, bioreactor (13 aerators/stirrers), MCC1 & MCC2 switchgear, clarifiers and RAS/WAS pump chambers, with a Phase 2 remedial works programme produced.

WATER TREATMENT

Rehabilitation & Upgrade of Criterion Water Treatment Plant

Design of electrical panels and motor control, plus instrumentation & control upgrades across the treatment plant.

INSTRUMENTATION

Flow Metering Across Wastewater Treatment Plants

Supply & installation of Parshall flumes, open-channel and clamp-on ultrasonic flow meters, including web-server based data loggers for remote monitoring.

POWER SYSTEMS · PUMPING

HV Switchgear & Pump Systems — Ncema & Fernhill Water Plants

Installation of 88kV SF6 circuit breakers with 88/6.6kV 3MVA transformer protection relays, and 6.6kV multi-stage centrifugal pump systems with soft starters, actuated gate valves and motor protection.

MOTOR & PUMP CONDITION TESTING AT A MUNICIPAL WATER PLANT

PROTECTION RELAY COMMISSIONING (ABB SPAJ)

Core Competencies

- Design Basis / Concept / Detailed Design Reports
- Load flow, short circuit & protection coordination (ETAP, PowerCAD)
- Siemens & Delta PLC programming
- MCC, DB, VFD & SLD drafting (AutoCAD)
- FIDIC-based project & contract management

WHAT WE DO

Two Disciplines. One Company.

Electromechanical & Municipal Engineering

Water & Wastewater Infrastructure

TREATMENT PLANTS · PUMP STATIONS

- Electromechanical condition assessments & Phase 2 remedial programmes
- BNR / bioreactor automation & aeration control
- Flow metering & SCADA integration

Automation & Instrumentation

PLC / SCADA / IIOT

- PLC & SCADA programming — Siemens, Delta, Allen-Bradley, Schneider
- Instrumentation & control panel design
- IIoT platforms via Node-RED & MQTT

Power Systems & Switchgear

HV / MV / LV

- Switchgear design, supply & installation
- Energy auditing & power systems analysis (ETAP, PowerCAD)
- Motor, pump & valve control systems

Public Infrastructure & MEP

STREET LIGHTING · BUILDINGS

- Solar street lighting design (DIALux, EN 13201, BCC approvals)
- MEP coordination — HVAC, fire protection, plumbing & drainage
- Engineering tender documentation (FIDIC, BoQ)

AI & Web Application Development

SaaS & ERP Platforms

FULL-STACK DEVELOPMENT

- Full-stack SaaS platforms — React, TypeScript, Supabase, Next.js
- Multi-tenant ERP — accounting, payroll, inventory, VAT
- School & enterprise management systems

AI & Automation Tools

DOCUMENT INTELLIGENCE · RAG

- AI document processing (invoice scanning, PDF intelligence)
- RAG architecture & AI chatbot integration (Gemini, Claude, GPT)
- Web-based SCADA dashboards & real-time monitoring interfaces

PORTFOLIO

Selected Projects

STREETLIGHTING · DESIGN

Solar Streetlighting — Norwood Tracks & Portfolio

Lead electrical designer for multiple BCC-approved solar streetlighting schemes, including Norwood Tracks (828 units), Umanini Development (217 units across 4 sections) and Glengary Residential. Designed per EN 13201:2015 using DIALux, with pole-spacing calculations for 6m–40m road categories.

MEP · CIVIL

Calundike Exports — Shop Alterations

Subcontracted MEP design & supervision for a ground floor plus 145m² first-floor addition in Bulawayo: electrical reticulation, fire alarm (Eaton MXpro 5), CCTV (12 cameras), lightning protection, HVAC, plumbing & drainage. Bidding documents prepared to FIDIC standards.

IIOT · AUTOMATION

Oceans Milling Automation

Deployed weighbridge & factory automation system with real-time production tracking, QC spot checks, shift reporting, and a live leaderboard dashboard.

AI · SAAS

SnapBuuks & SimpliBooks

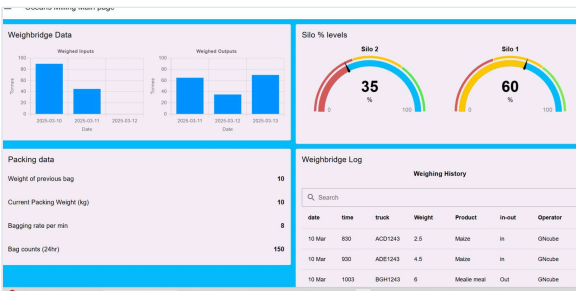

AI-powered accounting automation and multi-tenant accounting ERP platforms — invoicing, payroll, inventory, multi-currency reconciliation and VAT reporting, in production use today.

SOLAR STREET LIGHTING INSTALLATION, BULAWAYO

PUMP CONTROL PANEL — GRUNDFOS MP204 AUTOMATION

REAL-TIME IIOT WEIGHBRIDGE DASHBOARD

LEADERSHIP

T. Dube — Director

THULANI DUBE · DIRECTOR, RAMCODE INVESTMENTS

An electrical engineer with ten years of experience in the planning and implementation of municipal infrastructure projects, including water conveyance, water treatment, wastewater treatment, traffic lighting and radio communication systems. Thulani spent over a decade at The City of Bulawayo's Water Department before founding Ramcode Investments in 2020 to bring both electromechanical and modern software engineering capability to clients across the region.

Credentials

- 2014 Bachelor of Engineering in Electronic Engineering**
National University of Science and Technology, Zimbabwe
- 2012–23 Electrical Engineer, The City of Bulawayo**
Water Department — design, engineering, procurement, commissioning & maintenance of electrical, instrumentation & control systems
- Certified Energy Auditor**
Association of Energy Engineers (Membership #90987)
- 2020 Founded Ramcode Investments**
Bulawayo, Zimbabwe
- Now ZIE Membership Candidate**
Electromechanical Engineering — professional registration in progress

Let's Build Something Real.

Whether it's a municipal water treatment upgrade, an industrial automation system, or a custom software platform — Ramcode Investments brings the engineering discipline and technical depth to deliver it.
