RAMCODE INVESTMENTS
PROFESSIONAL ENGINEERING SERVICES

COMPANY PROFILE

Mining & Industrial Supply and Engineering Services

SERVING

MINES & INDUSTRY ACROSS ZIMBABWE

Electrical, instrumentation and control materials, mining consumables and on-site engineering, from our Bulawayo base.

November 2026

"We aspire to provide the highest quality in engineering, design & project management services."

SUPPLY CATALOGUE, PART 1

ELECTRICAL & INSTRUMENTATION

Our main supply lines, specified and checked by an engineer before they leave our hands, supplied from regular stock or through OEM and distributor partners. Product photos on page 04.

CATEGORY	TYPICAL ITEMS
Switchgear & protection	Contactors (AC/DC), MCBs, MCCBs, ACBs, VCBs and SF6 breakers, fuses and holders, thermal overloads, motor protection relays, CTs and VTs, isolators, busbars and trunking, enclosures and panel boards
Cables & accessories	Armoured (SWA) power and control cables, flexible and trailing cables, glands, lugs, joints and terminations, cable trays and ladders, earthing materials
Motors & drives	AC/DC motors, single and three phase; variable speed drives and soft starters; motor installation and alignment
Lighting	LED floodlights and high-bay fittings for plant, workshops and stores; perimeter and solar lighting; emergency lighting
Underground lighting	Cap lamps and chargers, underground-rated luminaires
Pumps & valves	Centrifugal and submersible pumps; seals, spares and maintenance kits; gate, globe, ball, butterfly and check valves; pneumatic, hydraulic and electric actuators
Instrumentation	Pressure, flow, level and temperature instruments; ultrasonic, radar and electromagnetic flowmeters; smart transmitters; control valves and positioners; analysers for pH, conductivity, turbidity and dissolved oxygen
Control systems	PLCs, HMIs and SCADA hardware across Siemens, Delta, Allen-Bradley and Schneider platforms; PLC panel wiring and fabrication
Power & solar spares	Surge protection, DC isolators, inverter and solar balance-of-system spares, UPS and battery units

BRANDS WE SUPPLY

ABB · SIEMENS · Schneider Electric · WEG · PHOENIX CONTACT · legrand · SKF · Atlas Copco · Parker · BOSCH · FLUKE · 3M

Brands shown are trademarks of their respective owners; Ramcode supplies genuine products through authorised distribution channels. WEG logo, WEG, CC BY-SA 4.0, via Wikimedia Commons.

SUPPLY CATALOGUE, PART 2

MINING CONSUMABLES

General, mechanical and plant consumables for underground, plant and surface teams, specified to your requirements and delivered to site.

CATEGORY	TYPICAL ITEMS
PPE	Hard hats, safety boots and gumboots, reflective overalls and workwear, gloves, safety glasses and goggles, ear plugs and muffs, dust masks and respirators, harnesses and lanyards
Safety & signage	First aid kits, fire extinguishers and servicing, safety signage, barricade tape, lockout and tagout kits, spill kits, eyewash stations
Cleaning & hygiene	Detergents, hand cleaners, degreasers, mops and brooms, refuse bags, ablution consumables
Hoses, pipes & fittings	Hydraulic, air and water hoses; couplings and clamps; HDPE, PVC and steel pipe; flanges, gaskets and fittings
Bearings & transmission	Bearings, V-belts, couplings, seals, fasteners, conveyor idlers and rollers
Lubricants	Engine, gear and hydraulic oils; greases; rock-drill oil, supplied in drums and pails
Drilling consumables	Drill bits, drill steels and rods, shank adaptors, rock-drill spares
Mill & plant wear parts	Grinding balls and rods, mill liners, screen panels, cyclone and pump wear parts, steel wool for electrowinning
Process reagents	Activated carbon, lime

HOW WE SUPPLY CONSUMABLES

CONSOLIDATED ORDERS

Mixed electrical, mechanical and general items combined on one quotation and one delivery, so your stores team manages fewer vendors.

MATCHED TO SPECIFICATION

Items checked against your part numbers, sizes, ratings and standards before dispatch, with any alternative clearly proposed.

REPEAT SUPPLY

Regular stores items can be quoted on a repeat basis, with quantities and delivery frequency agreed to suit your consumption.

NOT ON THE LIST?

If an item you need is not listed here, send us the description or part number and we will advise on availability, alternatives and lead time.

SUPPLY CATALOGUE, PART 3

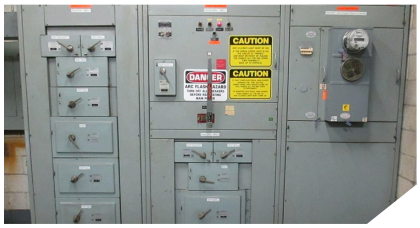

PRODUCT RANGE AT A GLANCE

A visual guide to the categories we supply most often to mines and industrial plants. Photos show typical products, not specific brands or stock.

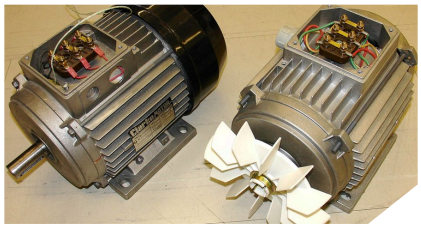

ELECTRICAL CABLES

SWA power and control, flexible and trailing cables, glands and lugs

SWITCHGEAR

Breakers, contactors, relays, isolators and panel boards

ELECTRIC MOTORS

AC and DC motors, single and three phase

VARIABLE SPEED DRIVES

VSDs and soft starters for pumps, fans and conveyors

LED FLOODLIGHTS

Plant, workshop, stores and perimeter lighting

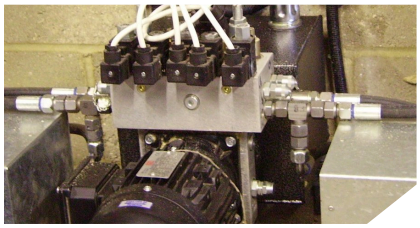

PUMPS & VALVES

Centrifugal and submersible pumps, valves and actuators

PPE

Hard hats, boots, gloves, eye, ear and respiratory protection

HOSES & FITTINGS

Hydraulic, air and water hoses, couplings and fittings

BEARINGS & BELTS

Bearings, V-belts, couplings, seals and idlers

LUBRICANTS

Engine, gear and hydraulic oils and greases, in drums and pails

DRILL BITS

Drill bits, drill steels and rods, shank adaptors

GRINDING MEDIA

Grinding balls and rods, mill liners and wear parts

ABOUT RAMCODE

WHO WE ARE

Ramcode Investments is a Bulawayo-based electrical engineering and automation company, established in 2020. We supply electrical, instrumentation and control materials and deliver engineering, design, drafting and project management services across municipal, industrial and process environments.

OUR VISION

To be the preferred partner in delivering reliable, high-quality electrical and automation engineering solutions across Africa.

OUR MISSION

To provide high-quality, cost-effective electrical, instrumentation and control materials and services, ensuring customer satisfaction through technical excellence, reliability and timely delivery.

BACKGROUND

Since 2020 Ramcode has supplied engineering, design, drafting and project management services to clients in their respective engineering disciplines, built on honest, unbiased engineering advice. The company is led by its Director, Thulani Dube, who spent 10 years at the City of Bulawayo (2012 to 2022) as Principal Electromechanical Engineer, alongside manufacturing and industrial projects.

Our offer to the mining sector combines two things a busy operation needs: a dependable source of electrical, instrumentation and general consumables, and engineers who understand how that equipment is installed, tested and kept running.

2020
ESTABLISHED, BULAWAYO

B.Eng
DIRECTOR, NUST 2014

CEA
CERTIFIED ENERGY AUDITOR (AEE)

WHO WE WORK WITH

MINING
Underground and open-pit operations, processing plants, engineering workshops and stores.

INDUSTRIAL & MANUFACTURING
Production lines, process plants, utilities and maintenance teams.

MUNICIPAL & WATER
Water and wastewater treatment works, pump stations and street lighting.

ENERGY
Power distribution, protection, solar systems and energy efficiency.

Mines and plants need spares that arrive on time and match the specification. Ramcode aims to be a responsive local supplier and electrical engineering partner for operations across Zimbabwe.

WHY RAMCODE FOR MINING

LARGE-ORGANISATION EXPERIENCE, LOCAL RESPONSIVENESS

Mines and municipalities run on the same backbone: high-voltage supply, motor control centres, pumps, instrumentation and strict procurement rules. Our Director spent 10 years delivering exactly that at the City of Bulawayo (2012 to 2022), as Principal Electromechanical Engineer.

THULANI DUBE, TECHNICAL DIRECTOR

City of Bulawayo, Principal Electromechanical Engineer, 2012 to 2022 (10 years). Municipal infrastructure delivery covering water treatment, wastewater treatment, pump stations, traffic lighting and high-voltage systems.

Qualifications: B.Eng Electronic Engineering, NUST Bulawayo (2014); Certified Energy Auditor, Association of Energy Engineers (#90987); PRINCE2 Foundation Certificate in Project Management.

Since 2020: Director of Ramcode Investments, delivering electromechanical assessments, panel design and build, electrical testing, street lighting design and project supervision.

WHAT THAT MEANS FOR YOUR OPERATION

HV AND POWER RELIABILITY

Hands-on background in high-voltage systems, switchgear and protection, relevant to hoists, crushers, mills and processing plants.

PUMPS, MOTORS AND MCCS

Years of keeping municipal pump stations and treatment works running translate directly to dewatering, process water and slurry pumping.

PROCESS INSTRUMENTATION

Water treatment instrumentation (flow, level, pH, dissolved oxygen) uses the same principles as CIL and other process control.

PROCUREMENT DISCIPLINE

Familiar with how a large organisation buys: specifications, quotations, bid evaluation and complete procurement paperwork, delivered correctly first time.

ENGINEERING SERVICES ON SITE

MORE THAN A SUPPLIER

Every supply line is backed by engineering capability, so faulty or wrongly specified equipment is caught before it costs production time.

ELECTRICAL TESTING & MOTOR MANAGEMENT

Megger and insulation resistance testing, transformer condition assessment and motor management for critical drives such as hoists, mills, crushers and pumps.

PANELS, MCCS & INSTALLATIONS

Control panel design, assembly, wiring and commissioning; motor control centres; electrical installations and fault diagnostics.

INSTRUMENTATION & CONTROL

Supply, installation and commissioning of instruments and analysers; PLC programming; SCADA and HMI configuration for plant visibility.

POWER SYSTEMS ENGINEERING

Load analysis, transformer and switchgear design, protection coordination and ETAP / PowerCAD studies, useful when production ramps up and loads grow.

ENERGY AUDITING

Certified Energy Auditor-led audits that pinpoint savings on motors, pumping and compressed air, and help get the most from on-site solar and grid supply.

PROJECT & CONTRACT MANAGEMENT

PRINCE2 and FIDIC-aligned delivery, procurement support, bid evaluation and multidisciplinary site coordination for shutdowns and upgrades.

DIGITAL TOOLS, IF USEFUL

Ramcode also builds software. Where it helps, we can add simple dashboards for stores, maintenance and shift reporting, or IoT telemetry (Node-RED, MQTT) for pumps and motors. This is an option, never a condition of supply.

QUALITY, SAFETY & DELIVERY

QUALITY FIRST, ON TIME

QUALITY

- Engineer review of every order against the requested specification, rating and standard before dispatch
- Genuine products from authorised channels, with datasheets and manufacturer certificates supplied where available
- Test records for tested equipment such as motors and insulation tests
- Non-conforming items replaced or credited promptly
- Quality management follows documented in-house procedures

SAFETY ON SITE

- We follow client site rules, inductions and permit-to-work systems
- Lockout and tagout, and testing for dead, before any electrical work
- Correct PPE for every Ramcode person on site
- Safety documentation (SHEQ policy, method statements, risk assessments) provided on request to suit each client's requirements
- Insurance cover arranged to client requirements

DELIVERY & LOGISTICS

Coverage: delivery to mine sites and plants across Zimbabwe from our Bulawayo base, arranged around each site's access and receiving requirements.

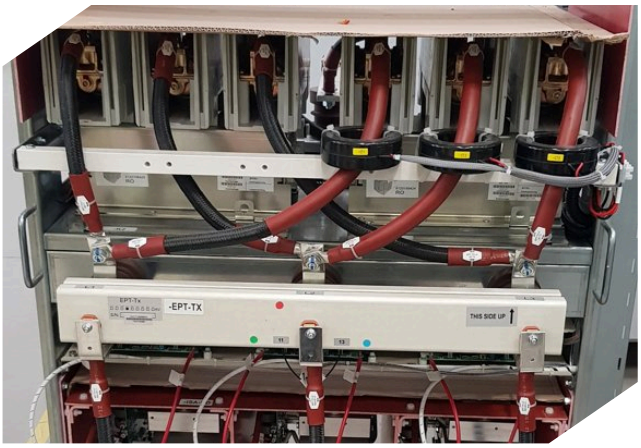

Lead times: confirmed on every quotation, for both stock items and items ordered through our partners.

Urgent breakdowns: support is available for critical electrical spares, subject to availability.

Transport: by road, with delivery notes, packing lists and proof of delivery for your stores.

Quotations: itemised, VAT shown separately, in USD, with validity and delivery terms stated.

Payment terms: agreed with each client in line with their vendor policies.

PAST EXPERIENCE

PROVEN IN THE FIELD

Selected work by Ramcode and its Director. Details and contacts are available on request.

ENGAGEMENT	SCOPE
City of Bulawayo Director's employment, 2012 to 2022, as Principal Electromechanical Engineer (10 years)	Municipal infrastructure delivery: water treatment, wastewater treatment, pump stations, traffic lighting and high-voltage systems.
Water & wastewater treatment plant assessment and design	Electromechanical assessment covering MCCs, motors, pumps, instrumentation and SCADA; motor and MCC testing; rehabilitation scope and phased remedial programme.
Solar street lighting	DIALux design to EN 13201, submissions approved by Bulawayo City Council, installation supervision and commissioning.
Control panels & transformer testing	Panel design, assembly, wiring and commissioning for pump stations and plants; on-site transformer and switchgear testing.
Industrial automation	PLC/SCADA integration, telemetry and dashboards for production, QC and shift reporting.

WHAT CLIENTS CAN EXPECT

- A single point of contact from quotation to delivery
- Engineering support for installation, testing and commissioning
- Honest technical advice on specification and alternatives
- Complete paperwork for procurement, stores and audit

LET'S TALK

We would value the chance to quote on your next electrical, instrumentation or consumables requirement, or to visit your site to understand your stores and maintenance needs.
